DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on 10/1/01 are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 2-10 are allowed.
3. The following is an examiner's statement of reasons for allowance: claims 2-8 and 10 are allowed for the reasons stated in the previous Office action; the prior art fails to disclose the recited combination of elements in a method of setting signal levels of in-phase and quadrature phase components of a radio receiver between a minimum threshold voltage and a maximum threshold voltage, including comparing the signal levels of the in-phase and quadrature phase components to a predetermined the minimum threshold voltage; increasing the gain of the automatic gain control stage by a predetermined amount; and repeating these steps until the signal levels of the in-phase and quadrature phase components are greater than or equal to the predetermined minimum threshold voltage, as in claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
